Professional Academic Writing in the Humanities and Social Sciences Sep 03 2020 In Professional Academic Writing in the Humanities and Social Sciences, Susan Peck MacDonald tackles important and often controversial contemporary questions regarding the rhetoric of inquiry, the social construction of knowledge, and the professionalization of the academy. MacDonald argues that the academy has devoted more effort to analyzing theory and method than to analyzing its own texts. Professional texts need further attention because they not only create but are also shaped by the knowledge that is special to each discipline. Her assumption is that

knowledge-making is the distinctive activity of the academy at the professional level; for that reason, it is important to examine differences in the ways the professional texts of subdisciplinary communities focus on and consolidate knowledge within their fields. Throughout the book, MacDonald stresses her conviction that academics need to do a better job of explaining their text-making axioms, clarifying their expectations of students at all levels, and monitoring their own professional practices. MacDonald's proposals for both textual and sentence-level analysis will help academic professionals better understand how they might improve communication within their professional communities and with their students.

Academic Writing and Identity Constructions

Jan 26 2020 This book presents multiple cultural and contextual takes on working performances of academic/writer/thinker, both inside and outside the academy. With worldwide, seismic shifts taking place in both the contexts and terrains of universities, and subsequently the altering of what it means to write as an academic and work in academia, the editors and contributors use writing to position and re-position themselves as academics, thinkers and researchers. Using as a point of departure universities and academic/writing work contexts shaped by the increasing dominance of commodification, measurement and performativity, this volume explores responses to these evolving, shifting contexts. In response to the growing global

interest in writing as performance, this book breaks new ground by theorizing multiple identity constructions of academic/writer/researcher; considering the possibilities and challenges of engaging in academic writing work in ways that are authentic and sustainable. This reflective and interdisciplinary volume will resonate with students and scholars of academic writing, as well as all those working to reconcile different facets of identity.

Tailored to students in EMI programs, the content was piloted and revised during a longitudinal writing study. They describe in detail the structure and contents of academic papers, especially conceptual and empirical research papers for journals. This lucidly written book will be a rich resource for MBA students and researchers working for MPhil and PhD degrees, especially in the fields of management, behavioural sciences and communications.

Improving the Academic Writing Experience in Higher Education May 24 2022 To fulfill their academic purposes in higher education, students must mobilize knowledge learned in the classroom, but also obtained individually and with access to a variety of sources, in particular, the information resources available in their libraries. To achieve an academic degree as master or doctor, information resources grow in importance and meaning, since because from them a great part of the theoretical and

*methodological support is obtained for the pursuit of this purpose. The validation of their learning is carried out in large part by the written presentation of these academic works. The book reflects on the importance of academic writing and presents methods and techniques for writing in a grounded manner. The contributions that make up the book *Improving the Academic Writing Experience in Higher Education* aim to bring ideas and share experiences, broaden horizons and shed some light on the landscape of academic writing. The different formulations, perspectives, and approaches are divided into two parts: the first one with a conceptual point of view, explaining the importance of the development of academic writing within the university and theorizing about the transformative impact of this practice on the higher education' student. The second one seeks to bring a more practical, diversified and comprehensive contribution to the thematic and to respond to the challenge of professionals related to the area -- particularly those involved in higher education libraries, but not only -- and who work with the transformation of information into knowledge. Through concrete tips for writing appropriately in a university context, the*

focus is on how and why to write well. The challenge that mobilized the achievement of this book was to encourage better learning and academic success, through awareness of a concrete action of teachers, students, and librarians who, in higher education, develop their activities in support of academic writing. We hope, therefore, that this will be a catalyst for renewed learning around this subject.

The Hand of Science Aug 22 2019 The collaborative character of science and scholarship, whether formal or informal in nature, is the focus of this discussion by a master of the subject. The world of scholarly communication is evolving with exponential speed. Propelled by the Web and the rapid transition from paper to electronic journals, the scale of the research effort is moving from the individual to research conducted by dozens of scientists scattered all over the globe. These changes evoke many questions: What does it mean to be an author in an age of collective effort? How are responsibility and credit allocated in collaborative endeavors? What is the relationship between reading, referencing and reputation - the political economy of citation? How are social relations inscribed in intellectual

space? Will the move to online and open access publishing provide new measures of authorial salience and intellectual impact? Cronin answers these questions as he captures the complex relationship between authorship and the reward system of science.

Academic Writing and the Emerging Scholar Jan 08 2021

Writing and Identity Oct 24 2019 Writing is not just about conveying 'content' but also about the representation of self. (One of the reasons people find writing difficult is that they do not feel comfortable with the 'me' they are portraying in their writing. Academic writing in particular often poses a conflict of identity for students in higher education, because the 'self' which is inscribed in academic discourse feels alien to them.) The main claim of this book is that writing

is an act of identity in which people align themselves with socio-culturally shaped subject positions, and thereby play their part in reproducing or challenging dominant practices and discourses, and the values, beliefs and interests which they embody. The first part of the book reviews recent understandings of social identity, of the discursive construction of identity, of literacy and identity, and of issues of identity in research on academic writing. The main part of the book is based on a collaborative research project about writing and identity with mature-age students, providing: - a case study of one writer's dilemmas over the presentation of self;- a discussion of the way in which writers' life histories shape their presentation of self in writing;- an interview-based study of issues of ownership, and of accommodation and resistance to conventions for the presentation of self;- linguistic analysis of the ways in which multiple, often contradictory, interests, values, beliefs and practices are inscribed in discourse conventions, which set up a range of possibilities for self-hood for writers. The book ends with implications of the study for research on writing and identity, and for the learning and teaching of academic writing. The book will be of interest to students

and researchers in the fields of social identity, literacy, discourse analysis, rhetoric and composition studies, and to all those concerned to understand what is involved in academic writing in order to provide wider access to higher education.

Throughout its six theoretical and practice-oriented studies, together with the introductory chapter, foreword and afterword, ethnography-related concepts like thick description, deep theorizing, participatory research, research reflexivity or ethics are discussed against the affordances of ethnography for the study of academic writing. Academic Writing Aug 03 2020 Writing is

crucial to the academic world. It is the main mode of communication among scientists and scholars and also a means for students for obtaining their degrees. The papers in this volume highlight the intercultural, generic and textual complexities of academic writing. Comparisons are made between various traditions of academic writing in different cultures and contexts and the studies combine linguistic analyses with analyses of the social settings in which academic writing takes place and is acquired. The common denominator for the papers is writing in English and attention is given to native-English writers' and non-native writers' problems in different disciplines. The articles in the book introduce a variety of methodological approaches for analyses and search for better teaching methods and ways of improving the syllabi of writing curricula. The book as a whole illustrates how linguists strive for new research methods and practical applications in applied linguistics.
