Comments on the National Resources Planning Board's Studies on Transportation, Submitted to Congress by the President on November 5, 1942 Dec 07 2020

Naval Studies Board 40th Anniversary Nov 17 2021 Forty years ago the Naval Studies Board was created at the request of then Chief of Naval Operations Admiral Elmo R. Zumwalt, Jr. As stated in his request to the National Academy of Sciences, he thought it important for the Navy to have an outside resource to which it could turn "for independent and outside counsel on any area of its responsibilities involving the interplay of scientific and technical matters with other national issues." Admiral Zumwalt, together with Under Secretary of the Navy Honorable David S. Potter and President of the National Academy of Sciences Dr. Philip Handler, recognized the importance of not only continuing but also focusing and strengthening the relationship that had existed between the National Academy of Sciences and the Department of the Navy since the Academy's creation in 1863. To commemorate this special anniversary, Naval Studies Board 40th Anniversary provides an overview of the history, mission, and accomplishments of the Board. In the coming years, the Naval Studies Board will continue to serve as a source of independent, long-range, scientific and technical planning advice for the nation's naval forces. It will also work to ensure that the relationships between the operational, science, engineering, and technical communities remain as strong and productive as ever to ensure that progress continues in areas most critical to meeting future naval forces' needs.

Creative Arts K-6 Dec 31 2022 "The Creative Arts K-6 is one of six key learning area syllabuses for the primary curriculum. This syllabus provides information about teaching and learning in Visual Arts, Music, Drama and Dance. It replaces three existing syllabuses: Music K-6 (1984), Visual Arts K-6 (1989) and Craft K-6 (1972). In response to consultation on the writing brief, this syllabus is called Creative Arts K-6, rather than taking the name of the key learning area, Creative and Practical Arts."--Introduction.

Spiritual Health Nov 29 2022 As spirituality first appeared in Australian curriculum documents in 1994, it was important to establish how educators thought it related to student well-being. In this research a description and four accounts of spirituality - spiritual rationalism, monism, dualism, and multidimensional unity - were developed from available literature. The literature also revealed four sets of relationships important to spiritual well-being. These were the relationships of a person with themselves, others, environment, and Transcendent Other.

Board Games as Media Sep 23 2019 Leading expert Paul Booth explores the growth in popularity of board games today, and unpacks what it means to read a board game. What does a game communicate? How do games play us? And how do we decide which games to play and which are just wastes of cardboard? With little scholarly research in this still-emerging field, Board Games as Media underscores the importance of board games in the ever-evolving world of media.

International Handbook on Globalisation, Education and Policy Research Jul 14 2021 The aim of this Handbook is to present a global overview of developments in education and policy change during the last decade. It has the objective of providing both a strategic education policy statement on recent shifts in education and policy research globally and offers new approaches to further exploration, development and improvement of education and policy making. The Handbook attempts to address some of the above issues and problems confronting educators and policy makers globally. Different articles seek to conceptualize the on-going problems of education policy formulation and implementation, and provide a useful synthesis of the education policy research conducted in different countries, and practical implications. The Handbook, by focusing on such issues as - the OECD (2001) model of the knowledge society, and associated strategic challenge and 'deliverable goals' (OECD 2001:139) - UNESCO-driven lifelong learning paradigm, and its relevance to education policy makers, globally - different models of policy planning, and equity questions that are raised by centralization/decentralization, diversity/uniformity and curriculum standardization issues - the 'crises' of educational quality, the debate of standards and excellence, and good and effective teaching. - will contribute to a better and more holistic understanding of the education policy and research nexus; offering possible strategies for the effective and pragmatic policy planning and implementation at the local, regional and national levels.

HKU SPACE and Its Alumni Dec 19 2021 This book examines in detail the efforts of the University of Hong Kong to provide adult education opportunities at university level, the establishment of its Department of Extra-Mural Studies in 1956 and the School of Professional and Continuing Education (HKU SPACE) in 1992.

How To Face IAS Interview: Character and Nation Building (Prabhat Prakashan) Sep 27 2022 This book also creates an understanding of interview in its totality. Knowing the types of interviews, the importance of interview, mock interview and bio-data/curriculum vitae is described. The significance of an informational interview is explained and the ways to handle group discussion and interviews are

given.—From book

The Routledge Handbook of Heritage Language Education Jun 12 2021 The Routledge Handbook of Heritage Language Education provides the rapidly growing and globalizing field of heritage language (HL) education with a cohesive overview of HL programs and practices relating to language maintenance and development, setting the stage for future work in the field. Driving this effort is the belief that if research and pedagogical advances in the HL field are to have the greatest impact, HL programs need to become firmly rooted in educational systems. Against a background of cultural and linguistic diversity that characterizes the twenty-first century, the volume outlines key issues in the design and implementation of HL programs across a range of educational sectors, institutional settings, sociolinguistic conditions, and geographical locations, specifically: North and Latin America, Europe, Israel, Australia, New Zealand, Japan, and Cambodia. All levels of schooling are included as the teaching of the following languages are discussed: Albanian, Arabic, Armenian (Eastern and Western), Bengali, Brazilian Portuguese, Chinese, Czech, French, Hindi-Urdu, Japanese, Khmer, Korean, Pasifika languages, Persian, Russian, Spanish, Turkish, Vietnamese, and Yiddish. These discussions contribute to the development and establishment of HL instructional paradigms through the experiences of “actors on the ground” as they respond to local conditions, instantiate current research and pedagogical findings, and seek solutions that are workable from an organizational standpoint. The Routledge Handbook of Heritage Language Education is an ideal resource for researchers and graduate students interested in heritage language education at home or abroad.

Scholars in the Marketplace. The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005 May 24 2022 Scholars in the Marketplace is a case study of market-based reforms at Uganda's Makerere University. With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa, it has implications for the whole continent. At the global level, the Makerere case exemplifies the fate of public universities in a market-oriented and capital friendly era. The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good. Instead of pitting the public against the private, and the state against the market, this book shifts the terms of the debate toward a third alternative than explores different relations between the two. The book distinguishes between privatisation and commercialisation, two processes that drove the Makerere reform. It argues that whereas privatisation (the entry of privately sponsored students) is compatible with a public university where priorities are publicly set, commercialisation (financial and administrative autonomy for each faculty to design a market-responsive curriculum) inevitably leads to a market determination of priorities in a public university. The book warns against commercialisation of public universities as the subversion of public institutions for private purposes.

Culture and Foreign Language Education Jan 20 2022 The teaching of culture and interculturality is today viewed as an integral part of

foreign language education. This book presents insights from recent research on the role of culture in second/foreign and heritage language education. It contains 14 chapters including an introductory chapter that discusses diachronically the evolving notion of culture and how the sociocultural view of culture as a complex and dynamic concept informs language teaching and language learning research. The chapters following the introduction are organised in four parts focusing on: 1) the teacher's role in integrated language and culture learning; 2) the interrelationship between culture, identity, and language learning and use; 3) the effect of culture on learner characteristics which impact language learning processes and outcomes; and 4) curriculum development aimed at fostering language and culture learning. The chapters in Parts 1 to 3 present contributions from current research - either in the form of the authors' original studies or comprehensive reviews of relevant essential research - which bears important implications for curricular practice in foreign language and language teacher education. This close link between research, theory and practice is also maintained in the two chapters in Part 4, which present developmental projects based on well-grounded theoretical frameworks.

EBOOK: ASSESSING TECHNOLOGY Aug 27 2022 How did the development of assessment practices influence the emerging technology curriculum? How does practice in the UK compare to practice in the USA, Germany, Taiwan and Australia? For thirty years the UK has been evolving a distinctive technology curriculum. In part one of this book Richard Kimbell explores the thorny issues of assessment that have been raised by - and that helped to define - the technology curriculum in the UK. Richard writes as an 'insider' who was closely involved in the evolution of GCSE, in the battles that characterised the development of national curriculum assessment, and in the single biggest research venture in the assessment of technology - the Assessment of Performance Unit project of 1985-91. He analyses the successes and the mistakes and brings these together (in chapter 6) into a series of lessons that we should have learned about technology and about assessment. In part two, Richard presents four vignettes of curriculum and assessment practice in technology from the USA, Germany, Taiwan and Australia. In each case the education system, the technology curriculum and its associated assessment practices are outlined. Thereafter - in the final chapter, Richard brings together the lessons learned in the UK with those that might reasonably be learned from practice in the four case study nations.

Understanding Others, Educating Ourselves Sep 03 2020 Since 1988, the Board on International Comparative Studies in Education (BICSE) at the (U.S.) National Research Council of the National Academies has engaged in activities designed to increase the rigor and sophistication of international comparative studies in education by encouraging synergies between large and smaller scale international comparative education research, to identify gaps in the existing research base, and to assist in communicating results to policy makers and the public. Under the current grant (1998-2002), funded by the National Science Foundation and the U.S. Department of Education's National Center for Education Statistics, BICSE has sponsored public events and commissioned papers on the effects of the Trends in International Mathematics and Science Study (TIMSS), the power of video technology in international education research, international perspectives on teacher quality, and advances in the methodology of cross-national surveys of education achievement. This report responds to a request from the board's sponsors under the current grant to produce a report that builds on its previous work.

TExES Social Studies 7-12 (232) Book + Online Nov 25 2019 REA's TExES Social Studies 7-12 (232) Test Prep with Online Practice Tests Gets You Certified and in the Classroom! Teacher candidates seeking certification to become social studies teachers in Texas public schools

must take the TExES Social Studies 7-12 (232) test. Written by Dr. Dean Ferguson, a nationally recognized test-development expert based at Texas A&M University-Kingsville, our prep provides extensive coverage of the exam's seven domains and 26 competencies. In addition to a thorough review, this test prep features a diagnostic test and 2 full-length practice tests (1 in the book and 1 online at the REA Study Center) that deal with every type of question, subject area, and skill tested on the exam. Our online tests offer timed testing conditions, automatic scoring, and diagnostic feedback on every question to help teacher candidates zero in on the topics that give them trouble now, so they can succeed on test day. REA's test prep package includes: - Comprehensive review of all content categories tested on the TExES Social Studies 7-12 exam - Online diagnostic that pinpoints strengths and weaknesses to help focus study - 2 full-length practice tests based on actual exam questions - Practice test answers explained in detail - Proven study tips, strategies, and confidence-boosting advice - Online practice tests feature timed testing, automatic scoring, and topic-level feedback REA's TExES Social Studies 7-12 (232) is a must-have for anyone who wants to become a social studies teacher in Texas.

Cambridge Anthropology Jan 08 2021 There are very few inside accounts of academic departments, their history and ethnography. The Department of Social Anthropology at the University of Cambridge constitutes an appropriate case study to fill this gap. Having emerged from the work of figures such as Maine, Robertson Smith, Rivers and Haddon through to more recent international scholars such as Fortes, Leach, Goody, Gellner and Strathern, it is one of the oldest and most distinguished departments in the social sciences. It has trained many of the leading anthropologists working today, and many of its students are established in important positions around the world. It has added enormously to our understanding of the wider world through research in all continents and regions. Based on thirty-five years of participant-observation fieldwork in the Department from 1975-2009, as Lecturer, Reader and Professor, Alan Macfarlane gives a brief history and reflects on life in the department, including the physical space, clothing, conversation, meetings and micro-politics. He also describes some of the changes over fifty years of post-colonial adaptation. This small book is part of the celebration for the 100th anniversary of the founding of the Faculty of Archaeology and Anthropology held in Cambridge in February 2015.

American Journal of Education Apr 10 2021

Innocence, Knowledge, and the Construction of Childhood Feb 18 2022 This book provides a critical examination of the discourses that underpin the regulation of children's access to certain knowledge – understood as 'difficult knowledge' – and highlights the way this regulation contributes to the construction of childhood, to children's vulnerability, to broader social relationships (including adult-child relations of power), and to the constitution of the 'good' future citizen in developed countries. Through this analysis, the author critically engages with the relationships between childhood, innocence, moral panic, censorship and notions of citizenship. She argues that the regulation of children's access to particular knowledge largely stems from the social construction of childhood innocence and the socio-cultural-political values that constitute and define childhood. This book explores how and why the strict regulation of children's knowledge, often in the name of protection or in the child's best interest, can ironically, increase children's prejudice around difference, increase their vulnerability to exploitation and abuse, impact on their health and well being, and undermine their competence as children, as well as their abilities to become competent adolescents and adults.
